TECHNICAL SKILLS

- **Programming** : Python, PyTorch, NumPy, Pandas, Git, Linux
- **Machine Learning** : Graph Neural Networks, Generative Models, Deep Learning, DSP
- **MLOps** : CI/CD, Testing, Deployment, Docker
- **Software** : MaxMSP, Ableton, Reaper, Inkscape, MuseScore

LANGUAGES

- English ██████████
- French ██████████
- Greek ██████████
- Spanish ██████████
- German ██████████

OTHER

- Music performance (Guitar, Trumpet, Piano)
- Music composition & production

PROFILE

Postdoctoral AI researcher with expertise in Graph Neural Networks and Generative Models for symbolic music and audio, affiliated with the Institute of Computational Perceptions and the Human-centered Artificial Intelligence (HCAI) group @JKU. Published 20+ peer-reviewed papers, developed open-source libraries, and contributed to multi-million euro EU research projects. Experienced lecturer and collaborator in interdisciplinary AI research.

PROFESSIONAL EXPERIENCE

JOHANNES KEPLER UNIVERSITY 2020 – PRESENT

- Conducted research on GNNs for symbolic music, publishing 15+ papers (ISMIR, etc.).
- Developed scalable deep learning pipelines for symbolic music analysis and generative modeling.
- Secured and contributed to EU-funded AI research projects.

UNIVERSITY OF MUSIC AND PERFORMING ARTS VIENNA 2022 – 2023

- Lecturer on Music and Sound Computing, designing and delivering graduate-level courses.

UNIVERSITY OF FINE ARTS LINZ 2021 – 2023

- Lecturer on computational musicology and audio technology.

TELECOM PARIS (INTERNSHIP) 2019 – 2020

- Researched deep learning methods for musical style classification.

STRASBOURG INSTITUTE FOR ADVANCED MATHEMATICS (INTERNSHIP) 2019

- Applied topological data analysis for graph-based music analysis.

SELECTED PROJECTS

WEAVEMUSE 2025

Open-source Agentic Library for Multimodal Music Understanding and Generation

- Built an agentic system for symbolic, audio, and text-based music tasks.
- Finetuned, quantized, and adapted models for multimodal generation.
- Enabled flexible local/hosted deployment with reproducible pipelines.

PARTITURA 2020 – PRESENT

Contributor to symbolic music processing library.

- Implemented parsers and ontologies for music structure.
- Maintained CI/CD and testing infrastructure.

GENERATIVE MUSIC MEDICINE 2024 – PRESENT

Fine-tuned large generative music/audio models for therapeutic applications.

- Developed emotion-conditioned diffusion models for music generation.
- Created novel GenAI methods in healthcare-focused music generation.

EDUCATION

JOHANNES KEPLER UNIVERSITY LINZ 2021 – 2024

Ph.D. in Artificial Intelligence. Thesis: Graph Neural Networks for Symbolic Music Analysis.

DIDEROT UNIVERSITY PARIS 7 2018 – 2020

M.Sc. in Mathematical Logic and Programming Fundamentals.

DESCARTES UNIVERSITY PARIS 8 2017 – 2019

M.A. in Composition and Musical Programming.

ARISTOTLE UNIVERSITY OF THESSALONIKI 2012 – 2017

Diploma in Musicology (Integrated Master on Composition and Analysis.)
